## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 7, Applicant's use of alternate terminology (i.e. "or") on line 14 renders the claims indefinite since the metes and bounds of the claim cannot be readily ascertained; the use of such terminology should be avoided.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Olsson et al. (US PAT. 5,423,313).

The Olsson et al. reference discloses a respirator system comprising a patient circuit 15 adapted to be coupled to a ventilator 10, an insufflation catheter 20, a source of insufflation gas 24 and a flow control system 42 which is responsive to the pressure present in the insufflation catheter to control a first selectively actuatable valve 24 that is at least operable to disconnect a

patient circuit from the source of insufflation gas and communicate the insufflation catheter with the source of insufflation gas (see also col. 4, line 61 through col. 5, line 15 where a multiplicity of miniature solenoid valves associated with the ventilator are disclosed).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Olsson et al. in view of Olesen (US Pat. 4,487,155).

The Olsson et al. reference discloses a respirator system (*supra*), but fails to disclose a master shut-off valve as claimed. The Olesen reference discloses another respirator system having a conventionally known master shut-off valve 56 to control the overall flow of gas through the system. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include a master shut-off valve as claimed in the Olsson et al. device in view of the teachings of the Olesen reference to conventionally control the overall flow of gas through the system.

***Response to Arguments***

Applicant's arguments with respect to claims 7 and 9 have been considered but are moot in view of the new ground(s) of rejection.

***Allowable Subject Matter***

Claims 2-6 and 11-20 are allowed.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
